

MASTER YOUR VIBRATION

EVERYONE WANTS TO BE SUCCESSFUL AND PROSPEROUS IN LIFE.

Many of us are lured into pushing our product in the market place and comparing our brand with other contenders in our field, which can lead to discouragement.

The biggest mistake we can make is 'comparing and despairing', where we either hold back on pursuing our vision, or we try and imitate others and try to be something that we are not.

Our true brand can never be compared, because it is unique and can never be replicated.

The secret to accessing this truth is by connection to our core vibration. This is the space that Shakespeare wrote from, Mozart composed from, and Joan of Arc spoke from.

Deep within us is an essence vibration, that when we tune into it, we can clearly hear the still inner voice, and it's unimpeded flow of intuition, revealing to us our highest vision.

We are then shown the precise steps to follow to bring this vision to fruition.

How do I connect to my inner voice?

For 33 years I have been following my inner voice through the power of chanting. I was blessed to discover the transformational effect of the Yoga of sound and mantra.

Since then I have chanted daily, and I owe everything I have achieved in my life to this practice.

In 1990 I was guided from within to start a voice circle. My inner critic or judge said 'who do you think you are to do that and what to you know?'

Thankfully I didn't listen to the judge and I started my first voice circle, a space where people could begin to express their real voice by experiencing the power for themselves of chanting mantras.

This group began to expand in numbers, as word spread that it was the place to be on a Wednesday evening. People reported how alive and connected they felt, and the zest and enthusiasm they experienced, as they bathed in the sweet vibrations of the chants.

There was a tremendous sense of unity that followed, where members reported that in that state 'anything was possible' for their lives.

Once connected what happens?

Once you develop a regular daily chanting practice, the important thing is to listen daily to your inner guidance.

Over the years I have done this I have been intuitively inspired to uncover a career that I could never have imagined in my wildest dreams!

Through aligning to my highest vibration through chanting invitations and opportunities have effortlessly flowed in.

Who would have thought that chanting and voice work with corporate clients was a part of my destiny? I could never have come up with the brand on my own. Nor could I have imagined that my voice and mantra work would have the empowering impact that it has in the field of addiction recovery, which is a cause close to my heart.

Tuning in to yourself is the key to success in your life and your business.

"You might think chanting sounds a little strange and a bit woo-woo and yes it totally is, the same way mindfulness might sound a little strange if you've never heard of the concept before.

Like meditation, chanting is a profound practice that helps you quieten our mind, relax the body and shift your awareness and vibration."
